FiLogix Creates Link to emili®

August 15, 2001 — FiLogix Inc. announced today that it has enhanced its ECNI broker interface to create improved efficiencies, including a new link to **emili®**, Canada Mortgage and Housing Corporation's (CMHC) online risk assessment and processing platform.

The link to **emili®** is through ECNI and the LSS broker interface, which has been linked to **emili®** since 1998. The link is transparent to brokers using ECNI and gives them the ability to send mortgage applications and receive commitments without additional steps. ECNI applications are seamlessly reformatted and presented to lenders in the LSS environment, allowing lenders to consolidate the flow of the two origination systems on one standard platform.

Lenders may now send applications originating on ECNI to CMHC's **emili®** through the LSS gateway, saving significant time for all involved.

"We are pleased that mortgages originating on ECNI can now be directed to **emili®** with ease. This linkage to **emili®** further increases the number of ways a homebuyer's application can reach **emili®**, which provides mortgage insurance approvals in seconds," said Sharon Matthews, CMHC's Director of Product and Technology Development.

"FiLogix is excited to be able to take different platforms and streamline them to feed into **emili®** for the benefit of mortgage lenders and customers," said David Chapman, Executive Vice President, Strategic Initiatives for FiLogix.

About CMHC

CMHC is Canada's national housing agency, helping Canadians gain access to a wide choice of quality, affordable homes. CMHC is involved throughout the entire home purchase and ownership cycle. CMHC has been breaking new ground in the Canadian housing industry for over 50 years and has pioneered mortgage insurance products and services that have helped finance over one third of Canadian homes.
