

Go the Max with MorWEB

TORONTO, Ontario, June 09, 2008 — Marlborough Stirling Canada is pleased to announce the recent enhancement of the MorWEB mortgage origination platform to provide an interface to the web-based client relationship management system provided by GoMax Solutions Inc.

GoMax Solutions provides a single gateway website that allows mortgage brokers to personalize and manage a website hosted by GoMax, and within that portal, they can also handle and track mortgage applications, track commissions and manage clients through their industry leading client management system known as "MyClient".

GoMax also gives the mortgage broker a completely paperless platform through its web-based document storage and email tracking systems. Mortgage brokers no longer need to carry around their paper files because GoMax securely stores all of that data along with emails, and tags this information to specific client files. As long as you have access to the internet you have access to all of your clients' past mortgage information, documents and emails, making this a true paperless system.

MorWEB now includes a live online link between MorWEB and GoMax so that customer data entered into GoMax can be immediately accessible on the MorWEB platform. Data from the MorWEB system is automatically updated whenever any client or application data is changed, without any user intervention.

MorWEB also now has the ability to ingest mortgage applications taken either directly on the GoMax system or through any broker website using their "MySite" web hosting service.

Daryl French, President of GoMax Solutions says: "Our goal is to make it easy for mortgage brokers to do business, and by linking our systems into MorWEB we are opening up yet another way for them to efficiently capture and submit their deals. Partnering with MorWEB supports our strategy of helping brokers evolve toward the online and paperless world, where they can easily create and effectively manage their own multi-faceted online presence and ongoing client communication to maintain and grow their book of business."

Bill Pitkin, Marlborough Stirling Canada's President and CEO, says: "Mortgage brokering is all about managing relationships, and as a technology provider, we want to make sure that our users have all of the best options available to them. The GoMax platform provides an attractive range of customer relationship management functions that can be used in conjunction with MorWEB to help brokers track, analyze and maintain a comprehensive understanding of their client base and to use that knowledge to grow and better serve their market."

About GoMax Solutions Inc.

GoMax Solutions Inc. is a leading provider of web solutions developed by mortgage brokers for mortgage brokers. The GoMax Solutions platform was first conceived in 2005 as a way to provide mortgage brokers with a professional online presence. Since that time development has evolved to include the ability for brokers to handle and track mortgage applications, track commissions and manage clients through a Client Management System which continues to develop. GoMax Solutions employs a full time research and development team, research analysts, and support department with the goal of moving forward with its vision of providing brokers with a single point of entry to manage all aspects of their business.
